CROSS

ADVENTURES AWAIT

HIGH PERFORMANCE AND DRIVING PLEASURE

Whether you are planning a summery outing to a near-by island with your children, a fast-paced day full of water sports or an autumn fishing trip, Yamarin Cross will always be your trusty companion. The heart of the boat is in its fantastic performance and superior handling. Its sturdy aluminium hull guarantees comfortable and safe travel no matter the weather. As an owner of a Yamarin Cross boat you can begin the boating season right after the thaw and continue to enjoy the waters well into dark autumn nights.

SAFETY

Your safety and that of your friends and family is important to us. For this reason, all Yamarin Cross boats go through vigorous and extensive tests, starting with the design phase. The boats are tested in different conditions for hundreds of hours. As a result of careful design and testing, we can bring a safe motor boat to the market that everyone enjoys on the water. We do all of this so that you can feel safe and concentrate on what is important – enjoying the waters.

NORDIC QUALITY FOR NORDIC CONDITIONS

The hulls of Yamarin Cross boats are made of aluminium alloy, which can withstand blows, scratched and bottom contact better than other boat construction materials. It also does not gather moisture, burn, crack or rust. It endures extreme Nordic weather conditions well, which allows you to continue boating well after others have laid their boats up for winter. In addition, the hybrid construction – with an aluminium hull and a fibreglass deck – not only ensures a sturdy construction, but also minimised hull noise.

NEW ADVENTURES AWAIT

In the summer of 2017, the Yamarin Cross boat line changed ownership to the Inha Works, owned by Yamaha Motor Europe N.V. This allows the long-lasting collaboration with the world's most popular outboard engine brand Yamaha to continue as even closer than before. Such a development is logical, since Yamarin Cross is among the most sold boat brands of the Yamaha network in Northern Europe. This twosome has always been a sought after and valued combination that retains its value. Together with the best retailers, we guarantee our customers fast and flexible delivery and service. A shared future as part of Yamaha will ensure the continuing success of Yamarin in the coming years.

BOATERS' FAVOURITE

Yamarin Cross has found its way into the hearts of boaters. The boat combines the durability of aluminium boats with the comfort of fibreglass. Yamarin Cross is a reliable choice with a heart that is pulsating performance. The boat provides enjoyable manoeuvrability for the skipper and ensures that the whole party travels in comfort and safety on the water. It is little wonder that Yamarin Cross boats have been comparison test winners in Nordic boating magazines.

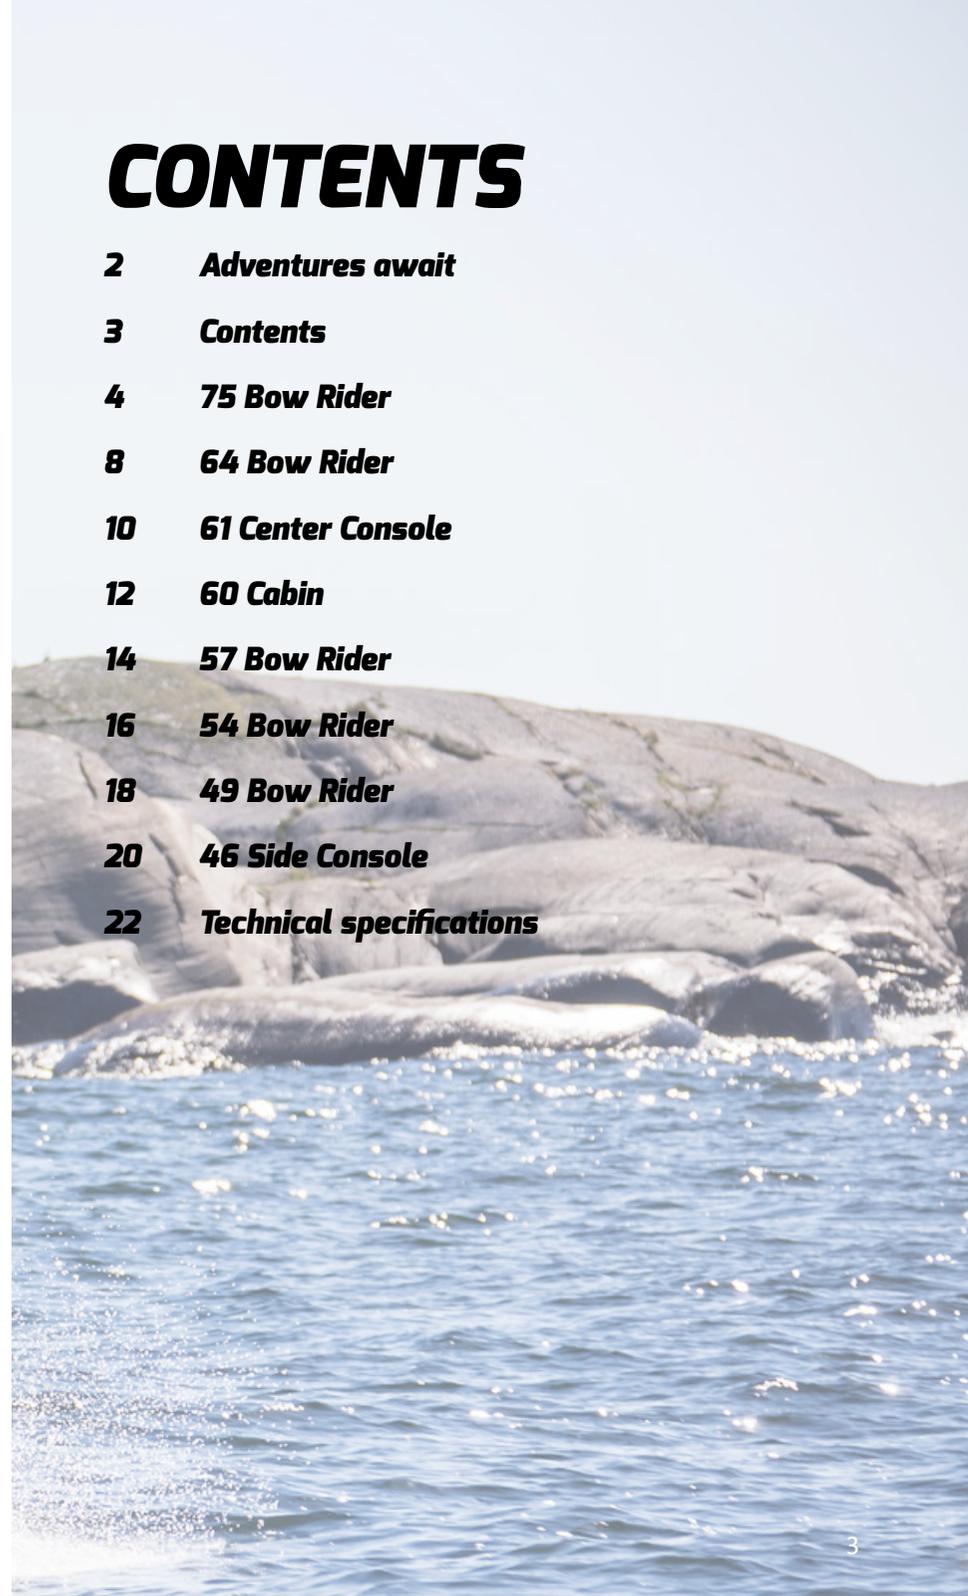

VERSATILE RANGE

Yamarin Cross boats were launched onto the market in 2011 and the current model range includes eight different models. Inspired by the range's success, we continue product development with the needs of our customers in mind. We want to offer an extensive range from which every boater can find the boat of their dreams. Yamarin Cross is always ready for a fast day of water sports, an outing to a near-by island with the family or a brisk autumn fishing trip with friends.
